

I present to you oddlands

A parcasm of mine first started when I was roughly 5

Il warn you now

It's unbelievably long

Likely contradicting

Dark

Cringe

And vague

- Also a lot of grammar and spelling mistakes

In our world we exist but parallel to us is oddlands a empty untouched reality

It was formed many years ago when space giants (the only living thing at the time) there

Were 6 space giants with the ability to control reality arcav zapp squat lonin forquin and alit they team use the combined power to create the universe but alit tried to sabotage them for this he was forced billions of lightyears into the white space outside the universe when he returns he uses his powers to attempt destroying the world but he is quickly beat by zap

And zache

Other than that lets start at the beginning

When oddlands was formed a meteor struck it

This meteor formed the first life on oddlands the alindys a human but shorter and faster with a tall head and longer chin they eventually became humans and zapp would travel around the world killing humans but was eventually absorbed

Over time Kilot (Oddlands) was separated into two groups: mortals and monsters. They fought for land and so the first super soldiers were made. They experimented on 147 people, 14 of which were pregnant. The experiment took place at the crater. In case something went wrong, it would be easy to kill them. Things went well at first; they became powerful killing monsters at an insane rate. But soon they became addicted to the smell of fresh blood. And when there were not enough monsters to go around, they turned to the next best victim: killing humans. Even faster, they were locked away by a magical force and slowly became unrecognizable, killing all life in the small section of land. The remaining monsters soon repopulated and they signed a truce with mortals to live in peace. But prejudice still existed, and monster became a slur. So this wasn't the end.

On a nearby island, the humans fought off skeletons in the skeleton war until Skelly met Emit and they became friends, ending the war. After this, Old World Town, also known as Old City,

immediately began starting wars with mainland. The first time they won, the second time their troops were destroyed and a truce was signed off.

A couple hundred years later, Jack is born and the Nothingness takes over. After his plotline, the world is struck by Alit, who demolished 95% of the life on Oddlands, including plants. When he's finally defeated, he's trapped in a disc, hopeful never to be seen again. But we all know that's not what will happen.

After the fallout, Jack's sword, Zoro, the Nothingness, and Noah are found. The sword is broken, releasing a version of Jack and the Nothingness/Noah. Noah plans to finally end the world but is beat by Elyt. Blank finally ends Jack's life and the Nothingness. Elyt uses the sword of cores to win; the sword of cores was located in the dead center of the crater and it was a sacred item of power.

It was created by Arcav and contains the abilities of all the OG giants. With the sword now freed from its prison, Alit was begging to find a way out.

This is when Trenten, a 14-year-old boy, was working on his school paper. He traveled to exit the prison in the void when they met Alit. Using all the power he had remaining in his body to attempt killing the boy, instead he was absorbed. As he had hoped, Alit used the boy to steal the sword and take over the planet. He told him he was the good guy and they would rule the universe together. But at a certain point, it became too much and Alit was destroyed by none other than Frosty himself.

In a blizzard of hate and snow, the world reverted to normal.

Here are some more events:

During the age of the Nothingness, around 50 years before more accurately, an underground laboratory known as the Pother fired off a series of vibrations, ripping holes in the universe. This is eventually what caused Plasma to become a famous hero.

out of these gaps 4 creatures formed the ragnok which is literally a giant sentient volcano dinosaur 1 a gas like creature that knocked people around it out and drained their souls shadow eater a purple eyed humanoid who grew each time it consumed a life and the battle bots tiny robots that could fuse together and form demonic creatures

Plasma made a deal with the shadow knight skid to become a powerful shadow bender he used his abilities to kill the creatures perishing fatal however at the hands of shadow eater

meanwhile in Motrom a girl named Lexa was born

Years ago Jordan Fritz bought Motrom he didn't know about the town's history of criminals

But when he figured out he used his powers to create 10 gems

The fire stone

The earth stone

The water stone

The light stone

The portal stone

And the five stronger ones

The night stone

The death stone

The mystic stone

The building stone

And the life stone

The stones were to given to people who became superheroes

<https://docs.google.com/spreadsheets/d/11PLD4NGZhkbmeSgUz2lZqOgxr0csoKxAntTvINasuDw/edit#gid=0>

Years later they all retired and there gems merged into the infinite stone

Which a young boy named maxs bought for his rock collection

Using it he created more stones for the old heroes who were brought back to youth

Max grew up and he got stronger with his powers but after

His parents got in a fight his mother drove off and got in a wreck his father disappeared after that his sister was adopted and he slowly went crazy

All of that drove him insane after all was lost he created giant bubble were every inside was mind controlled to act neighborly and friendly he started to think it was the real world he loved it much until lexia came she was born within his magic mind controlled city but from a young age she was quite defiant one day disastour struck and she was hit with bolt of frozen elctricity giving her some unique abilities she could slow down time rip apart reality to her likeing create ice and shoot electricity after learning to use her powers she began to udnderstand how bad life was inside a

bubble where everyone was fake so one day she attacked max wakeing him from his false reality she began tearing apart the city whilst fighting him he was much much stronger due to haveing 10 stones of ability but she was tricky and in the end she abandoned the bubble town he followed her out not realizieng that it immidiatly destroyed the town and worse the stones lose there ability outside of the general area of joran fritz but hes dead so its his corpse max immideiatly fell to the ground and lexa returned freeing the village people and the heros stones were retrived and burried with jordan other than maxes infinite stone because she couldnt find him the assumption was he died when he fell but he didnt it it just so happened to be new years eve when he hit the ground he was thrust into W0 where he immideiatly got back up full of ange rhe became the 2nd person to ever escape from W0 before midnight he litterally tore a hole in reality by screaming a set of vibrations when he returned he wasnt in his time the only way to return to your time is the gate that closes at midnight the next day instead he found himself at the begining of time with nothing but a stone he needed help to so useing the stone he created some friends

arcav zapp squat lonin forquin and alit the original space giants but actually he made 7

arcav got the fire stone zapp the light stone squat the water stone forquin the life stone alit the death stone lonin received the a custom stone of relationships

and a unknown giant known as basil the galaxi queen she took the rest of the stones and made the other 987 space giants that came after the world was made she also made the other 200 mini giants that roamed the earth before handing the stones to alit and becoming dormant alit use the stones with the help of the other giants to create 3 objects the core a object that can grant wishes the sword which they put deep within a meteor and fired at woodlands and finally merged it back into one stone again they gave it to max who was instantly attacked as he attempted to bring the world into existence using everyones powers by alit alit took the stone but they grabbed it and use it first creating the rest of the universe and shooting alit deep into the white space with the stone this killed max once and for all alit kept the stone until he returned to the universe using trenten when he was finally killed the stone was returned to past jordan fritz who absorbed its powers to continue the timelines loop

more characters? okay

as you know when the crater hit the experimented there the pregnant woman's children were born and raised in society in a town called Normville where powers and magic and oddness was banned as a revolt against the wars it caused the people in this town were quite frankly emotionless and bland performing the same routine everyday till they died except the 14 children who soon developed emotions and abilities they became known as the 12 after one died and one refused to join them they lived for eternity protecting righteous

eventually it was narrowed down to 10 during a war against the floridian empire

the floridian empire is a monarchy from a void realm that ripped into oddlands and obliterated everything they were silver humanoids that could morph and rode boats in space \when they crashed into oddlands they depleted the population by 45% of the population leaving 10 rings

the ring of elements was a silver ring with a red blue green and white dot it allowed its user to bend elements

the ring of mentality was a purple gem with a spider leg grip it aloud users to read minds and trap people in their dreams

the ring of knowledge was a silver ring with a green gem in the center it allowed the user to pass on info by touching objects

the ring of life was golden decorated with a marble flower in the center it allowed the user to bring things to life

the ring of light was a simple metal ring with a tiny light bulb in the center it allowed its user to bring light to it and send light elsewhere

the ring of death was a black ring made of two snakes crossing path there heads meet as a purple gem it allowed its user to kill things on contact

the ring of time is a tiny watch it allows the user the ability to speed up slow down or freeze time as well as time travel

the ring of reality is a yellow star and could allow you to slow reality summon things telekinesis and other things

the ring of perception was a hypno circle attached to a black ring it allows you to summon illusions

and the tenth and most powerful ring was the ring of wishing it allows you to grant wishes for yourself or others

theses rings were discovered they were immediately stolen and spread around the world causing the war to break out between mainland and old city

but before that war broke out someone by the name of 6-7 stole them and used the time traveling properties of them to go to the future learn everything about the war and return to capitalize off of it quickly becoming the most powerful politician 6-7 use his future intel to monopolize off tiny eventa and exploit war soon he became power hungry and decided to gain more power he needed to steal another ring so he slaughtered the owners of every ring till he had 7 out of the ten the other three were the ring of elements the ring of death and the ring of light they were gathered by rowen a drifter mazo a winged human and raylee a cyborg girl with a robot arm raylee took the element ring and use it on her cyborg arm to absorb elements and fire them mazo took the ring of light allowing him to blind predators

and obviously rowen took the ring of death however this specific ring was different it wouldn't let it be removed from its user leaving rowen depressed for the instant he neared anything it perished he moved to Mount Hayville near the middle of Oddlands reaching insane heights the top is basically space you lose most gravity and have little oxygen he hid near the center to avoid killing anyone and when he arrived at the area he wanted to move to he discovered a cave after entering he found Alts core and when he got near the ring took over his mind unleashing a hellish wish until the world a virus of rot began to spread crawling through the soil eating all life moving at a steady 32 miles an hour in each direction consuming every bit of life and everything in its path at this time 6-7 was unaware as in his trips to the future he had never seen the virus so he had no knowledge of it and began searching for the death ring using a magic GPS he traced it to the mountain after climbing a few hundred miles he noticed a dark oily layer climbing down the mountain at an alarming rate this was the so called virus the death virus caused Rowen's skins to peel and his flesh to mutilate till he was nothing but a skeleton covered in chunks of rotten flesh and skin he was also trapped within the cave and began going insane the virus slid down to 6-7 instantly dissolving his hand he used his other hand to slit the rope and fall to the pass below he ran down the mountain the oily substance constantly behind him until he had an idea he reached for the reality ring but slipped dropping it into the icy pass so on instinct he leaped off the mountain after surviving only by grabbing the ring seconds before hitting the ground he teleported to the surface and began contacting authorities meanwhile Rowen's new insane variant was ripping through the stone walls when he escaped the cave he discovered that a ring had been dropped the ring of life Rowen picked it up and immediately began regenerating he was no longer human all he was was a shell a husk whose only goal was mass death and suffering the creature slid the ring onto his other hand which was covered safely by a glove and began its decent down the mountain through its goo of death when it arrived at the bottom authorities were waiting guns pointed high Rowen simply grimaced and lifted his hand up and each one was immediately killed as they hit the oily floor they were covered in a dark substance losing their humanity and becoming soulless entities the virus was proclaimed the eternal death aka TED and so Rowen's new form was named TEDDY ted spread across Oddlands killing thousands eventually 6-7 decided to step in as most of mainland had been killed he used the remaining rings to summon a powerful blast but it didn't work teddy nearly killed him but he escaped in time and decided to collect the other two rings and return he found Mazo and tried to reason but he refused so 6-7 attempted to kill him he was blinded and had his rings stolen Mazo took them and wore them at once luckily for 6-7 he still had the time ring though Mazo decided if he could collect them he could protect the world from their harmful properties so he met up with Raylee who easily agreed as long as she could help when they made it to ted he had already killed thousands Mazo tried to reason but immediately was attacked Raylee on the other hand turned to Mazo and shot him with a ball of helium trapping him inside a floating bubble she leaped up grabbing the bag of rings and equipping all of them in her bionic arm she flung her hand in the air and the oily liquid began floating up as she ripped the ring of life off his gloved hand and into her bionic arm the ring of death however was gone it had become Rowen and Rowen the beast howled and shot oil towards her which she quickly dodged ending the fight when she leaped

into the darkness firing a blast of life into it the death consumed her as it reformed into rowen again leaving only the ring of light in the sky with mazo the ring of life on the ground next to the ring of death the ring of time with 6-7 and the one ring that survived the death the ring of memory these rings were collected by rowen when he returned to the surface other than the time one obviously which was split into 3 versions one allowed future travel one allowed past travel and one allowed freezing of time the remaining one made it actually 4 versions the remaining one effected the speed of time these were given to rewind pause and fastforward his nephews for a reason that only he knew as he seen it in the future and he kept the remaining one for himself which he use to train for and impossible amount of time before returning to reclaim the remaining rings he found mazo and instantly killed him stealing the rings and equipping the final ones he took every ring up the mountain fused them together in a blast that killed him leaving one remaining ring known as the ring of life and death which actually granted you the abilities of memory time life death and light 76 years later rewind and fastforward who can now live forever due to there rings opened a tear in time releasing a monster from a time after time this will be one of the only remaining forms of life after reality ends its known as the raptor its awgiant black worm with sharp teeth many other beings entered from the tear and crowed the planet with violence pause tried to use his ability but things from other times wouldnt freeze so instead he was torn apart dieing instantly and unleashing a powerfull blast which snapped the tear shut rewind tried thousands of times to save him by rewinding but couldnt and fastforward went to the future but found himself lost in other timelines until eventually he ended up way back in the day he was born he had gained the knowledge of everything ever and told his uncle about the rings and how he needed to continue the loop then fastforward met up with rewind and they opened a gate to a time when pause existed and kidnaped him then all together using fastforwards infinite knowledge they performed an ultimate reset sending everything back to its time and resetting the universe this time they werent born so the rift never opened there identities were forced out of the universe and sent into a separate one oddlands is a planet in a galaxy known as pilot pilots a galaxy in a universe known as Maxot named after max obviously the universe however is part of an infinite set of variants known as WEB1 maxot and everything else inside WEB1 is sentient so it can force people into other parts of it or other webs other webs although there are only 6 are usually not the best place to be for instance WEB 0 is an endless void whose universes contained arent sentient No web is similar to another performing an ultimate reset doesnt effect other webs but it does effect everything in the web it occurs in speaking of time theres also a name for that each second in time is known as a biollop and exist solely within your web timetraveling in between webs can happen but it will only send you where you were at the time not the universe around you its almost impossible to leave your web unless your kicked out by the universe but thats rare so where did rewind pause and fastforward end up and wheres the white space if its not inbetween webs what is inbetween webs well to answer question one they were forced into one body known as TimeWind the answer to the second question the whitespace is inbetween sections of the web so you can end up in other versions of reality from there inbetween webs theres creatures known as livintos which are like space giants except only 5 there called universe giants there

names are 1 2 3 4 and 5 1 can create life 2 can create death 3 can create time 4 can create reality and 5 can create power this whole dramatic mess ended a couple years after rewind pause and fastforward should have been born most history played out the same until the rings were found rowen became ted and was killed by raylee but instead 6-7 kept the ring of time and killed mazo to get the ring of life and death fusing it with his time ring he created the ring reality with the same abilities as the ring of life and death plus the ring of time he hid the ring in a chest in the mountain where the wish was made and jumped off a tower using some ability to send himself to a void where time didn't exist and he was alone he wasn't seen again over time oddlands was taken over by a strict government where magic ceased to exist until libbie rose was born she went on a casual hike but ended up high in the mountain where the wish orb was she discovered the ring of reality and experienced all of history from the memory area she then used her ability to take down the government before finally smashing the ring in doing so she was sent to a pocket dimension of eternal hell this also caused a chain of events that went like this the government crashed the leader's son ran away the leader's son fell into a wormhole the leader's son woke up in the white space with no memory he decided to go by 6 after meeting 5 who was visiting the web he lived in 6 became an honorary universe giant and eventually gained the ability to create perception this new universe giant kind of just kinda broke physics smashing the alternate realities from each web into each other and eventually webs started smashing into each other creating a huge mess of realities this time was known as the down fall and wasn't really a great time for anything the universe giants ceased to exist and the space giants barely kept the realities together eventually when all was said and done the universes and dimensions and webs existed as one unescapable reality luckily there wasn't much overlap the new universe was named Kirty and was sentient it basically ate itself till every variant copy of a living thing was gone and each web had been shrunk into a planet this led to alien travel causing oddlands to gain visitors and increase diversity but other than that not much changed the space giants became the most powerful creatures again and life continued during this the however timewind was reborn and 6-7 re-appeared in oddlands they both met and became leaders splitting the planet in two but soon they died and new leaders were elected eventually things became normal again

nothing however lasts forever eventually oddlands came to an end when the creator fired off a blow of electrical patterns which caused the magic borders to break unleashing the other pups and others into the world not only this but humans and mushrooms alike began mutating into strange creatures until oddlands was known as PitchCork a kingdom ran on strangeness and anarchy it actually stayed like this for 1000s of years before eventually everyone had died off or left it

much more happened during the timeline for instance way back when jack was born he actually had a sister, jill

eventually she changed her name to Jay to avoid being made fun of for "jack and jill" when their parents died jack moved to krogam with their grandmother but she was an adult so she instead headed west past the tower and into the land of bob the land

of bob has some unique properties its a forest only a couple miles in each direction but its sentient and is a weak point in reality causing physics to break in some areas its also known for being a pocket dimension at any moment you can be sent to and infinite forest dimension filled with monsters this is actually where forestlings and mushroom folk come from any way as she delved deeper until she found herself in the pocket dimension she stumbled through the endless forest not knowing the trouble she'd gotten herself into the deeper she went the more sentient the forest became and it began to grow fond of her for every where she went she spread joy at least in the forest's eyes from her perspective she was trying to survive "feeding" birds was just her failing to lure them in (read jay and Jack's life's for the finished life story) during the age of anarchy the heroes rya hart (hartbreaker) zexkon (zexi) livita (liv/angel) MO(Monochromatic)alistor*quantum)

they were all sort of anti heroes mono had D.I.D alistor was skitzo livita was addicted to angel juice (liquid crack cocaine)zexkon had no family and rya was insane they didn't fight for justice at all other than mono who kidnapped children from bad lives and killed them because he's nutzo

eventually these heroes were all killed by the 14th ruler which i'll now explain the fallout was caused by a timer max set on the universe he told his fellow giants to destroy the universe when it ended however now nobody wanted to so they started fighting on whether or not to destroy it the giants became weaker {space and universe} until they were forced to retreat into human bloodlines afterwards there wasn't any magic and the universe started falling apart physics broke and laws were meaningless this would have caused if it weren't for the fact people are useless without a ruler it eventually became anarchy each of the 16 rulers had gotten abilities from a giant meaning they had magic here's some info about each one

1-eliz-she was 16 during the fallout and began using the universe giant of destruction to obliterate everything she was overtaken by

2-zinky bints-he was unborn when the fallout happened but was born with the universe giant of creation he ran a successful government but was killed by

3-monti-she was 22 when the fallout started she had the universe giant of life allowing her to rule for 4000 years until

4-alexi hems was born 4200 years after the fallout with the space giant of death he started a monarchy

he's the only known person to ever tame the death magic his monarchy reigned another 10 lifetimes

5-he was born with the abilities of the giant of perception he ruled momentarily then died

6-she had the universe giant of time and use this to rule for another 5000 years but upon death was erased from reality

6-2-he was also born with the time giant and use his ability to rule for exactly 8 days then died

7-zapp she was born with zapp and use his abilities to shockwave threaten everyone she stepped in a puddle and died zapp wasn't able to spread through her bloodline as she had no kids but

7-2- found her corpse and cut her arm absorbing zache he was a evil person and ruled till he died of old age

8-hazels great great great great...etc granddaughter inherited the abilities and went nuts she ruled 20 years before leaping into a tear in reality her name was liyla

9-we don't speak of 9 they had the abilities of alit

10-there were no record of him it's mostly agreed he had the abilities of arcav

11-no records of her either she appears however to have been powerful legend tells she had the powers of bazil

12-turns out jordan fritz is considered a giant after death he became one and was absorbed by emilia rose they ruled 80 years fairly

13-same with lexia apparently anyone who came in contact with the gem became a giant after death (not max though niko harts wrote his entire life in a diary including the fact he contained lexia their story's odd though he claims they fell in love and fused into one being ruling for 40 years however other claims insist he was seduced then had his body taken over as lexia went on a spree of horrible things

14-the only non magic ruler his name was grits and he gained power by selling angel juice and leading a drug cartel the odd part? he was 11 yet alive during the fallout what happened was he 10 during the fallout his family was killed and he became violently angry he wandered the world for a year before coming across a fountain underground the created cherub juice when mixed with halo dust and angel juice after one sip though he discovered his mixture was too strong and was literally sent a couple thousand years in the future he searched the world another year found the fountain and began mass producing it eventually ruling the world eventually he died and was taken over by

15-lonin and evergreen ruled by making people fall in love with her she died when a blind asexual fought her

16-the final ruler also had a strange story you see his giant was actually jackpirates grandmother turns out she received the gem from a friend's friend named you guessed it jordan fritz meaning she had touched it when she put it in her shop this also elects the possibility of jack or her friend touching it i get into that later though the final ruler and jacks grandma beth were really bad rulers not bad as in evil bad is in how the hell did you get so powerful they actually never killed anyone and drank a lot of tea they both died of old age

Then what? what about jack? what about the friend?

well let's get into it jack did touch the stone at one point but only the jackpirate from became a space giant guess which? i'll give you a hint there a pirate i've already mentioned nothing? well it was hazels

the friend was named roi and he well he became the reaper and gained the ability to go to the past convince jordan to give him the stone thus looping everything then the reaper went to the very beginning of time with a custom stone of life after death that max actually use to create the new reaper heaven corp and hell corp aswell as limbo corp wait death in oddlands lets talk about that

what happens when I die? What happens when they die?

well to start when i die another version of me will rund oddlands for 1000 years then nivag will take over for 10 years until its safe fore coco to move back into the imaginary friend agency

after that the human bodies will perish and the anarchy period will begin

after that the universe won't be destroyed but life will cease to exist until 1000 years after the full end of kilot the giants will be resurected and they will fuse together to become a final me il revampt the universe this wont be me but it will be the oddlands me he will imagine coco back into existance and reform oddlands in a new way im not aure what will happen next adventures? magic? joy? death? pain? but it will be incredible what happens after someone dies though lets pretend your a oddlandian

you get struck by lightning then what? well you meet the second grim or as hes called mr.grim who slices you and then you awake in an elevator where your deeds are calculated if your good your allowed one of three options volunteer for a job which will allow you more fullfiillment

cease to exist

or go to "heaven" whereyou live in a goodplace style world that isnt actually secretly hell

if your bad your given two options

work and reduce your bad deeds thus lessing your time in hell (its like prison depending on what you did you may eventually be allowed to leave but it will take a long time either way and some are never allowed out) or just go to hell corp whic is mor elike helluva boss hell not toruture just chaos and violence if you die after death you cease to exist or in rare accations become a higher employee which means you can no longerdie okay? what if your deeds are equal well first off your traumatized by your elevator amashing around before crashing in limbo where you get to live eternally limbo is a library infinite in each direction containing evrypossible life descicion etc theres no bottom either htough so you have to jump off paltforms tied to the side of the bookshelfs the librarians insane and mr.grims ex wife so she will errase you ffrom existance if she seesyou that is unless youw ere a misscariage or babby there treated diffrently your deeds arent counted till two and upp so if you dieyou go to limbo she will raiseyou as 2 or youngers actually grow after death until there about 16-25 years old at which point they just stopthen you can choose to live a

life in the huamn world with no memory go to hell.corp or go to heaven corp nix and liz are misscarage given this oppurtunity they dont know and decide to hide from the limbo goverment they accidently wipe out a group of historical figures by detsroying a coupld thousand bookshelves as punishment there sent to earth its done quickly though so the gov forgets to make them babsy and wipe there memories they plan world domination after there plotline with norman the move back into limbo what happens if you stay on your elvator when it lands in heaven or hell weell it just continues downwards through a tunnel then explodes falling into an area on top of limbo {up isnt infinite}known as elevator hell its just a pile of every elevator evr used plently come in every second eventually you will either be crusehd or the gov will find you

okay so do oddlandians know this?

some belive it some are atheist there areonly 4 belif systems one the correct one two space giants are from anotherworl where you go after death 3 nothing happens or four your reborn

okay so do they have like a massiah? are there angels ? is there a god and a satan ? what do these things look like? do they go to oddlands? lets awnser all that real quic
1.not really they have prince whose an angel that came andkilled demons when they began infestingoddlannds

2.yes they are bicaly accurate angels and also non bibbicaly its a mix

3.kind of the satan is whoever in hell is strongest but its not an official title

3.b.not really the saem as ours hes a buissness man with a ball of light fro a head he enjoys goldfish

4.already awnsered in the other questions

5.yes demons cause bad vibes but binnybinblackng or binny for short fights them binny was given powers by prince so know he lives forever fighting demons he has an eye on his forehwad his hand his chest and and eye above each of his fingers that float around each eye allows him another abilityy when equipped through the eyeon his chest binny although its not important is jewish asa throw back to jesus and as a way to make oddlands diverse

each eyeisnamed theone on the back is pots

the one his righ thand is slayer the one on the left is capture the one on his chest is absorb the one on his foreheadis sight the ones on his fingers are as follow

index1-prickly

middle1-pain

ring1-levitate

index2-illusion

middle2-form

ring2-jump

guess what they do lol

lets go back a little bit

first some facts

canonically the solar system exists in kilot

there are aliens on the planets

all but a few

saturn is sentient

i also started playing fnaf in

2021 and made a rippoff known as clayman

the story took place of a video game series Clayman 1

clayman owns a candy shop were there are magical clay statues out for blood your the nightguard

Bots

Bixbie vents

Jerome doors

Kido doors and vents

Maximas right door

Clayman 2

The rumors destroyed his old store but he rebuilt it your the night guard

Bots

Joey doors

Karma vents

Laxs cam that he appears on off or he will attack

Mixer hiede in vent

Dj when his music play shut of power

Clayman 3 scrapped nightmares

In agony he scrapped it all in a warehouse where his clueless son works as night guard
You are clayman's son

Glitch

Clayman he wonders he peaceful

Dax he will enter your room if you don't reset generator once his brothers arrive you die

Pax he will enter your room if you don't close your doors when he's near by once his brothers arrive you die

Max he will enter your room if you don't hide in vent when he appears on cams once his brothers arrive you die

Dexter vents

Rex doors

Clayman the factory short film

Clayman discovers the government plans to end the world with his powers and they have kidnapped his grandson dave he saves dave and enters clayman's nightmares dave is helped to escape by jeff aka glitch and his dad fred falls into the clay molder glitch uses a force field but in the process gets stuck to dave is running from a villain and also falls into the force field the clay is killing the force field its been up for 2 days clayman wakes up and saves them but dies in the process he jumps in and absorbs it all this kills him after he dies his experiment the dark clay opens

Claymans nightmare

He gets buzz sawed in half after realizing he's horrible

The five people that originally died

Give him nightmares of what he did to them

The dark clay chronicles

Twister he cant enter through door because he has no arms its not locked though so close the vents

And the blobs close vent door or window there at

Scrap yard the finale

Years after everything the bots are sent to the woods and the clay merges with trash you get lost in the wood you must head out for wood to light your fires

Jake left light on

Eddy right light on

Shadow vent closed

Beast door closed

Dodo and scarp no noise when salvaging

Jimmy hide when he enters

Timmothy find toaster

Kimmy turn off lights

Jerry head into the woods

Nightmare when you hear him in the woods use flashlight quickly

Dream when you fall asleep she will visit just wake up

Also if you don't know when you dream you are attacked by the clay but pixelated so your goal is to die before they kill you so you wake up also during the day you go to the junkyard to get upgrades

the story is as follows

clayman makes clay statues useing human souls to keep his candy shop popular

his children discover this

one gets thrown into a pot a mixes with another soul

the other gets amnesia then adopted then works for every company his biological father opens

he has a son the government uses the clay to plan a takeover

its take your kid to work day

the magic pot is absorbed by clay

he died

the dark clay became the nothingness

long ago a curse was set, every 1000 years a hero is born with a special ability, seeing another world known as kato a world of mystical things people there are faceless they roam amongst us using their abilities to interfere some powerful others less some kind other violent and vengeful and mindless these heroes are known as prophets their job is to use their abilities to keep the worlds from merging till they die in 1000 years during the time they are alive they age slower so they seem aged accurately

Gabe

a elderly man who offers wisdom to those who ask he runs an antique shop that ash frequents but hes hiding a secret hes aware of katos secrets and knew the past prophet he wont give his knowledge easily

Forest

a 16 year old childish wise slightly dark sense of humor and morbid tendencies shes quick and agile hard to befriend but once complete shes kind

Zula

a creature from kato she wears a faded pink dress with 1400s detailings and black heels shes wears faint white leggings and has a slight glow to her she also floats above the ground and doesnt speak but finds other ways to communicate

Ash

A 14 year old prophet liveing in the 20th is imformed of his role by an elderly man in a dream soon after he begins noticeing the creatures of kato and begins his mission1

Jacob

ashes brother who perished in a fire years before he was born watches ash grow up and is treated like an imaginary friend that ash talks to like he never died

dureing the fallout magic doesnt exist and a tsunami takes people to monster island

alerting super shadow of a world outside th eisland he goes out and fights crime caused by the lack of laws

another story takes place in a city near the coast of old town island known as clockwork kingdom

a boy named

james is a young orphan

he has been bullied by many but only recently he has begun to see a side to himself

he wants justice

but does it mean he needs to murder his bullies

well he thinks so he becomes a d.i.d patient

with like 15 personalities

he kills a bunch of folks

there's also a demon known as Tag which once summoned will chase you until spread
on then kill you

recently learned noah owns a bag containing the nothingness\ as an explanation i've
redone part of the lord the nothingness was defeated and obliterated by jack as usual
and as jack became JACK PIRATE AND WENT TO ZORO but noah did not exist within
the sword as usual he was forced into the human world with the nothingness bag and
time watch

as another fix noah is an orphan and a genius who founded the time bomb factory
which is unimportant but relevant nonetheless noah's stopwatch can protect him
from death as well there's a demon chasing him (which is actually maxium in a form of
existence on earth) to eliminate him the watch simply scares it off as it could
eliminate time itself

Worldbuilding time

Everyone who can speak can speak english but most beings have a native language
mushrooms? Mushling we also have a coding language called kode taught at a huge
computer shaped simulation building it uses 9 numbers and math symbols

1-if

2-then

3-affect

4-color?

5-set

6-customizable

7-create

8-destroy

9-edit

0-a/z reference a sprite

So for instance

1.(1=1)2.5.0-a.blue.

This means if 1=1 then set the color of sprite A to blue

Code is only use within the dome and can be use to alter reality within it you can also upload programs to the "internet"

Alrighty onto some lore revolving around the highly unstable dimension

It was recently discovered it's beyond huge

Dimensions like the oddlandian limbo are greater than anything ever conceived

So think that plus the other two afterlife's Zoro reality Bob ect every universe fused times 1.23

This universe is highly powerful and constantly forms reality s within itself these reality s are home to every story I've ever made not directly apart of oddlandian lore

Aswell I'm adding a new timeframe to oddlands

At some point

Before the fallout

Humans nearly went extinct

Because of eternal life

You see everything became perfect during the time of normviles rein

This caused a creation that allowed eternal life with the swallow of a pill

People who too this pill became tortured creatures slowly mutilating there own body's

Having kids would result in them being unable to die

Eventually a rocket filled with mutilated beings was set up by humans to launch into space at the crater

It combust the corpses of the other beings and mutilated unkillables fused createing fleshland which is basically a creator sized pile of flesh that consumes everything

Robots were made to burn the unkillables and dispose of there ashes but the robots became ai killing everything in sight

After pushing most unkillables into the other side

(I'll talk about realitys that aren't spoken of yet in a moment)

The humans also locked away the robots in the unstable reality causing a loop in which they aeperated there universe from the unstable and became the one I forgot the name of they then breached war ripping through the reality of the past

Anyway as promised realitys I've yet to mention

The shadow realm

I briefly mentioned when talking about plasma I believe but you can enchant your shadow burning it into a portal

The shadow realm is a void of shadows failing toe scape before sundown allows your shadow to take your place I. The humans world

Other side

Also known as kato

Let's real quick get into the lore of how it actually works

In my mind like my imagination is a pocket dimension between oddlands and reality I ts
also the inside of my body somehow and insideout type creatures keep me alive
there's doors to different realitys and a attic of stuff one door takes me into oddlands
that's the only way to get in without leaveing your real world you can also be sucked
through wormholes
